Karachi, Pakistan

EXPERIENCE

Software Engineer

Bank Alfalah Limited

Aug 2024 - Present

- Enhanced and extended the Customer **Onboarding Framework** backend using **C# and ASP.NET Core**, supporting configurable onboarding workflows for New-to-Bank account opening across channels and alignment with State Bank of Pakistan requirements.
- Integrated **NADRA biometric/face verification** and **Safe Watch screening** into the onboarding framework through **RESTful and SOAP** services, implementing request/response validation, external-service failure handling, and routing of flagged cases for manual review.
- Designed and built an **automated rule-based transaction categorization engine** in ASP.NET Core, using configurable sender-pattern rules and LINQ-based matching to automate transaction classification and support personalized spending insights.
- Developed a standalone **Windows Service** to automate prepaid-card cashback processing, including transaction eligibility checks and reconciliation against disbursement records
- Developed and optimized the **SQL Server** data layer using stored procedures, indexing, and query optimization, with **ADO.NET** for database access and **LINQ** for in-application filtering and aggregation.
- Troubleshoot production issues across backend services, APIs, and database operations, analyzing application logs, SQL data, and integration responses to identify root causes and implement fixes.

Technologies: C#, ASP.NET Core, SQL Server, T-SQL, ADO.NET, LINQ, REST & SOAP APIs, Windows Services

Engineering Intern

Disrupt.com (formerly Gaditek)

Oct 2023 - Jan 2024

- Executed manual, exploratory, and regression testing for the PureVPN mobile application, validating application functionality, user workflows, and overall product quality
- Performed functional and usability testing on PureVPN customer-acquisition websites, identifying and reporting defects through JIRA while collaborating with developers to support issue resolution

SUMMARY

Software Engineer with 2 years of experience building backend services and integrations for digital banking and fintech platforms. Skilled in developing secure REST and SOAP APIs using C# and ASP.NET Core, with hands-on experience in SQL Server, stored procedures, ADO.NET, and LINQ. Experienced across the backend development lifecycle, from requirements and implementation to production troubleshooting, with a focus on reliable, maintainable, and compliant solutions.

SKILLS

Languages & Frameworks

C#, .NET 8, ASP.NET Core Web API, LINQ, ADO.NET, HTML, CSS, JavaScript

Databases

SQL Server, SQL, Stored Procedures, T-SQL

Tools & Version Control

Visual Studio, VS Code, Git, Postman, SoapUI, TFS, IIS, Docker

EDUCATION

Bachelor of Information Technology

Bahria University, Karachi Campus

2019 - 2023

CERTIFICATIONS

Full Stack Web Development

Xloop Digital

Database Structures and Management with MySQL

Meta
